**RESPONSE TO NOTIFICATION OF DEFECTIVE RESPONSE
AND AMENDMENT DIRECTING ENTRY INTO THE SPECIFICATION**

Sir:

This paper is in response to the Notification of Defective Response mailed on March 11, 2002 for which a response is due on April 11, 2002.

Applicants submit this amendment to requesting entry of the enclosed paper copy of the sequence listing from International Application Number PCT/US99/21565 into the above-identified U.S. national phase patent application.

Applicant(s) submit the document(s) listed below to complete the filing for the above-identified patent application.

1. A Substitute Computer Readable Form (CRF) of the "Sequence Listing" of the above-identified USN application;
2. Sequence Listing (35 pp.);
3. Submission Under 37 CFR § 1.821 - 1.825 Sequence Listing (1 pg.);
4. A copy of PTO form PCT/DO/EO/905 (371 Formalities Notice); and
5. A return receipt postcard.

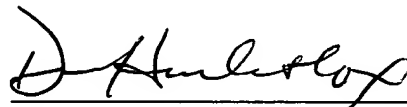

Applicants note with frustration that this is the FOURTH Notice of Missing Requirements/Notice of Defective Response received in this application. Each and every time the Notice has been incorrect in some way, including the present Notice, in which Ms. Booker inexplicably has requested a replacement sequence listing and an Amendment directing its entry into the specification – where it already exists and has since the initial PCT filing! These actions are not understood.

Applicant's do not believe a fee is due with this filing. However, if the Patent Office deems that a fee is due, please charge Deposit Account No. 09-0108.

If there are any questions regarding the above, the Examiner is invited to call the undersigned.

Respectfully submitted,
INCYTE GENOMICS, INC.

Date: 11 April 2002
